

Logitech®

# Webcam Pro 9000

with Logitech Vid, Zeiss® optics and autofocus and a 2-megapixel HD sensor

## Be there to share precious moments with Logitech high quality video calling.

Get razor-sharp video with ultra-smooth Autofocus and high-precision Carl Zeiss optics. The Logitech® Webcam Pro 9000 brings together an entire suite of top-of-the-line features designed to make sure you look and sound your best on camera. The Carl Zeiss lens system with Autofocus keeps you in sharp focus, even if you move around. Extras like Logitech® RightLight™ 2 Technology correct for poor lighting. HD video recording lets you create 16 x 9 widescreen videos at full 720-pixel detail. Your webcam even comes with new Logitech® Vid—the fast, free, easy, one-click-to-call video calling software.

### Key Features

- Includes new Logitech® Vid™ software—dramatically simplifies video calling
- Ultra-smooth AutoFocus with Carl Zeiss® lens system for sharper, fluid video
- HD video recording and 2-megapixel sensor capture detailed 16 x 9 widescreen videos and up to 8-megapixel photos
- RightLight™2 Technology adjusts brightness for perfect images, even in dim light
- Premium built-in microphone with RightSound™ Technology for crystal-clear conversations
- Logitech® Video Effects™ make calling home extra entertaining

Logitech Vid™

# Webcam Pro 9000

with Zeiss® optics and autofocus and a 2-megapixel HD sensor

Logitech®

## Your world never looked better.

### Logitech® Vid™: simple video-calling software

Free, fast, and easy video calling for you and anyone you call. And it's built into your webcam setup—so you're ready to talk to the people you care about right away.

### Carl Zeiss® optics with autofocus

Deliver razor-sharp images even in extreme close-ups.

### 2-megapixel HD sensor

Raises the bar on image quality, delivering fluid, true-to-life video at 720p and snapshots at up to 8 megapixels.\*

\*Enhanced from native 2MP sensor.

Dim Light

Rightlight™ 2

### Logitech® RightLight™ 2 technology

Intelligently adjusts to produce the best possible images, even in dim or backlit settings.

### System Requirements

#### Windows® XP (SP2 or higher)

- 1 GHz (2.0 GHz recommended)
- 256 MB RAM (512 MB RAM recommended)
